

Education

2019 – present Medical Student, Dept. of Medicine, School of Medicine, International University of Health and Welfare, Chiba, Japan

Career/Academic Appointments

2020 – present **Advisor, The National COVID-19 Cluster Taskforce, Ministry of Health, Labour and Welfare, Tokyo, Japan** (Prof. Hiroshi Nishiura)

- Performed ad-hoc analysis and research to provide risk assessment of coronavirus disease 2019 (COVID-19) epidemic and evaluate the impact of public health responses, including estimation and projection of the Alpha variant epidemic, evaluating vaccine effectiveness against death from population-level data, exploring the impact of healthcare burden on temporal case fatality risk, and more.

2021 – 2022 **Research Assistant, Graduate School of Social Sciences, Chiba University, Chiba, Japan** (Dr. Shouto Yonekura)

- Proposed a novel Bayesian framework for estimating waning vaccine effectiveness from population-level surveillance data in the presence of multi-variant circulation, working with Dr. Akira Endo (in London School of Hygiene and Tropical Medicine as of 2022).

2021 – present **Member, CoV-Navi** (<https://covnavi.jp/>)

- Reviewed the scientific evidence for science communication to the general public.
- Analysed the number of cause-specific death related to COVID-19 infection, comparing with deaths before the pandemic.

2022 – present **Research Assistant, Graduate School of Public Policy, Tokyo, Japan** (Assoc. Prof. Taisuke Nakata)

Evaluating the Age-Specific Effectiveness of COVID-19 Vaccines Against Death and the Impact of Healthcare Burden on Age-Specific Case Fatality Risk in Tokyo, Japan. The 32th Annual Scientific Meeting of the Japan Epidemiological Association. 2021 Dec. (Oral)

Skills & Interests

Analytical

Infectious disease epidemiology, Theoretical epidemiology, Mathematical modelling of infectious diseases, Bayesian inference, COVID-19, Monkeypox

Programming

R, Julia, Stan

Membership

1. Japan Epidemiological Association
2. Japanese Society of Tropical Medicine
